Our Values

- Integrity
- Transparency
- Trust
- Loyalty
- Service Excellence
- Quality of Product

Numolux Health

Through various business units, Numolux Health provides advanced and profitable solutions to clinical research, medical trials, medicines, medical equipment, and hospital infrastructure development industries. This subsidiary aims to improve the quality of healthcare services and medical research within and outside South Africa's borders.

Numolux Clinical Research: We have reached many milestones with this unit of our health portfolio. In particular;

- Through our partnership with Chinese pharmaceutical giant Sinovac Biotech – we successfully carried out paediatric clinical trials with the inactivated CoronaVac vaccine (which was administered to over 2.8 billion people) and vaccinated the youngest-ever child in the world. That baby was 6 months old at the time (November 2021) and thus far, shown no serious adverse effects.
- With our series of international health seminars, called “BRICS and Africa: Africa's Solutions to Africa's Health Challenges” we brought together thought leaders and experts in the medical, and pharmaceutical industries from BRICS and African countries and delved into issues which continue to plague the Global South, namely; Malaria, Non – Communicable Diseases, Regulatory Harmonisation and Mental Health and Wellness.

Numolux Health

Numolux Curanto Pharma: Ensures that products are, and remain compliant with South African legislation and policies.

- The focus is to streamline registration processes and facilitate the timely approval of medical products- while ensuring that they meet the highest standards and comply with regulatory frameworks and guidelines for safety, efficacy, and market access.
- The company acts as the liaison for both South Africa as well as Southern African Development Community Regulators and is and holder of the Certificate of Registration (HCR)/MA Holder on behalf of the product owner.

Hospitals Build Programme: Africa

Numolux Agriculture

Numolux Agriculture has a diverse footprint within the agricultural space. from our state-of-the-art, Fully Halaal Numo Meats abattoir in Ceres, to our livestock feedlots and our presence in the cannabis and dairy industries.

We are committed to improving food security around the globe, with an emphasis on African and BRICS related countries.

Business Units

Ceres Abattoir

Numo Meats:

Operations & Markets

- More than 100 job opportunities were created during the refurbishment of this facility.
- With our expected expansion we envision this number to reach 300 during 2023/2024.
- The abattoir is currently operational and has employed just over 40 personnel.
- We supply to wholesale, retail, hospitality and corporate markets.
- Red and brown offal markets have been established locally and internationally.
- Our international sales program envisions to include buyers from Egypt, Kuwait, other North African Regions, Russia and China.

Numolux Energy

In our Energy portfolio, we have entered into agreements with energy giants Huawei and MultriTrade and we are on track with our plans for our solar and wind- turbine projects, as well as our manufacturing and assembly plant.

- Solar Projects
- Wind-turbine Projects
- Manufacturing Plant
- Assembly Line
- Supply of Product
- Installation: Com & Res

Numolux Minerals

Numolux Minerals is a subsidiary of the Numolux Group.

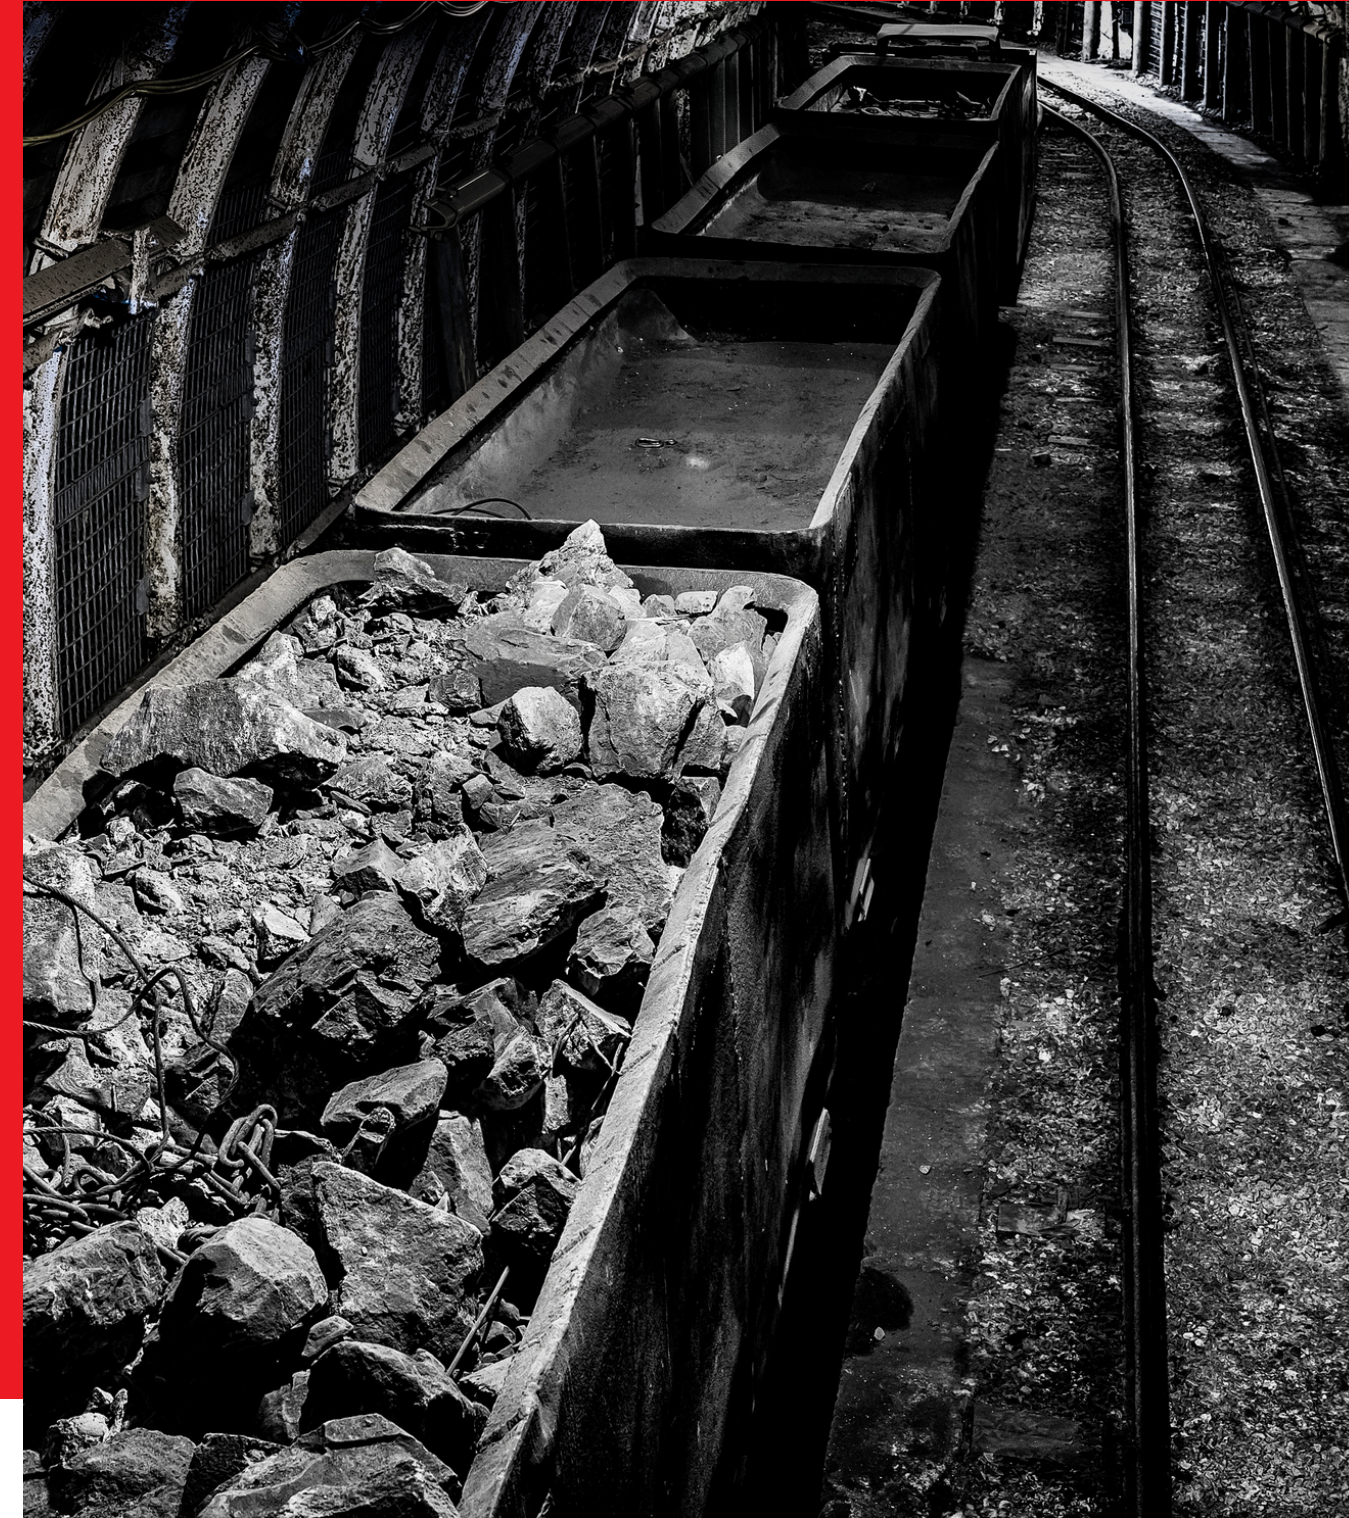

Mining Operations:

Our mining division is dedicated to responsible resource extraction, ensuring the efficient procurement of essential materials for energy production. We adhere to the highest environmental and ethical standards, implementing advanced technologies to minimize the ecological footprint associated with mining activities. By sourcing materials responsibly, we contribute to the overall sustainability of our energy solutions.

Numolux Minerals

Minerals Division:

Our minerals division boasts a variety of different mineral solutions. From mining to sourcing and logistics, we cater to the specific needs of our clients and ensure consistent and reliable supply. Our resources and reputation allows us the flexibility to negotiate the best terms and conditions. Our supply-chain partners range from blue-chip companies to exciting, promising start-ups. We are able to provide our clients' access to minerals within the ferroalloy, precious metals, and energy sector

Numolux Botoka Fuels
